

Angela B. Smith HB 5326

Honorable members of the Public Health Committee:

I am strongly in support of HB 5326, the act concerning aid in dying for the terminally ill. It is important to me because I watched my mother and my grandparents suffer for 3 or 4 years after having massive strokes. I worry about the huge amount of money that was spent to keep them alive all that time, knowing that they felt the same way and would like nothing more than a pill to put an end to it.

Yours truly,  
Angela B. Smith
