

Charlotte Mattern HB 5326

I am a Ct. resident, a citizen of the United States ("one nation under God...), and I strongly disagree with Mickey MacIntyre's statements written in the New Haven Register, Wed.,2/19/14.

Such a bill is introduced in such a way as sounding benevolent but over time becomes the opposite. One only has to look at the progression abortion rights. It started as a procedure to aid women who had been raped or experienced a life threatening pregnancy. Now, it has become a route of convenience, gender selection and financial management.

When control is taken away from the natural order of life and death and put into the hands of human beings (who only know in part) tragic events occur. The country will be responsible as a whole, for these deplorable actions.

Sincerely,

Charlotte Mattern
