I would like to voice my support for bill # 5326, aid in dying. As a practicing physician (Urology) since 1965, I have often had to deal with the agony of death, especially in those patients with malignant or neurological disease. For many of those people, death is a release from their pain, and a restoration of their dignity. As an elderly person myself (75), I am more concerned with how I dye, rather than why or when. Passage of your bill

#5326 will help many people who wish to have peace and comfort during the dying process.

Thank you.
