

Eva Olis

I am writing to ask your elected officials NOT to support HB5326. There is much progress that has been done in the area of palliative care in helping people ease their pain. The focus should be on the dignity of the person, therefore it is by far more compassionate to help and support these people. The supporters will say there are provisions the bill for those who can request to terminate their lives, but I am afraid that this will open the door to misuse or abuse of this law.

Please, please do NOT support this bill.
