

Jay Gonzalez HB 5326

To all members of the Public Health Committee:

I am writing in to testify against HB 5326 as it is terrible public policy. We can find alternative ways to ease suffering and pain of someone terminally ill without passing a law that supports assisted suicide, which is exactly what it is. It sets a precedent for the future and could possibly encourage mentally incompetent people to choose suicide. Please do not let this happen in CT and vote NO to HB 5326 or any other type of bill endorsing assisted suicide.
