

This is written-only testimony.

I am a retired arts administrator, living with my spouse at Essex Meadows, a lifecare residential community in Essex CT.

Currently I am of sound mind and body.

I believe that death with dignity should be a fundamental right and, most important, that individuals should have a choice at the end of life, whether or not they take advantage of it.

I enthusiastically support the passage of HB5326.

With thanks,

Jean Adams Shaw
