HB 5326

Mar 15, 2014

PHC Testimony  
CT

Dear Testimony,

No one should have to suffer at the end of life. Many dying patients suffer, even with the best care and pain management. I urge you to support the Compassionate Aid-in-Dying bill.

This sound legislation would give terminally ill, mentally competent Connecticut residents the right to administer medication to end their suffering and bring about a peaceful death.

Passage would make Connecticut the nation's fifth state to legalize aid in dying. Since Oregon passed a similar law in 1997, no cases of abuse have been reported. In fact, many who request the medication never even fill the prescription but benefit from the peace of mind of knowing that they have a measure of control over their final days.

This is fundamentally an issue of the incursion of religion over the secular state . Where did the right of our government to control a decisions over one's own life originate? The Romans, the Japanese among other more enlightened cultures did not interfere with this most intimate decision a private citizen can make,

Please support the Compassionate Aid-in-Dying bill today.

Sincerely,

Ms. Marjorie Olsen
