

I am a medical oncologist and was a medical director for a hospice for 20+ years. I am one of many physicians who strongly support Bill #5326. Patients with a terminal illness need the option of a controlled, humane, and peaceful death. Even with expert medical care and pain control, I have witnessed too many patients suffer needlessly. Patients are not forced to take this route, but they should have that option. Aid-in-dying has worked well in Oregon and other states. It should be the law in Connecticut.

Please pass Bill 5326.

Myron M. Turbow, M.D.
