

Patricia Ann Reese
HB 5326

As a resident of Ct and unable to attend the hearing on Monday, I would like to go on record to support this bill making it possible for a Dr. to legally prescribe medication for a mentally competent patient with a terminal illness that chooses to hasten their death. I believe there is no virtue in needless suffering and we should have the legal right to choose when we are ready to end life as we know it. Thanks for hearing my position on this.
