

Ruth R Wheeler
HB 5326

As a 77 year old female, I would like to see the legislation passed that would allow a death with dignity.

This would give me comfort that I could call the shots as to how I die. This is my body. I would like to have control over it.

I have completed my advance directives to comply with current Connecticut law. I want more. I do not want my care givers to be arrested.
