"Of all the healing modalities I have used as a physician, I believe homeopathy has the greatest potential to restore optimal health to people of all ages and especially to those suffering from chronic illnesses either psychological or physical in nature".

Dr. Sanchione

**Testimony**  
**To The Public Health Committee**  
**In support of Bill #5327:**  
**An Act Concerning Health Freedom and the Practice of Classical**  
**Homeopathy**  
**March 5, 2014**

Good morning Senator Gerratana, Representative Johnson and distinguished members of the Public Health Committee. My name is Dr. Louise Sanchione.

I am a Connecticut native and currently reside in New Haven. I have a medical degree in Naturopathic Medicine, a Master of Science degree in Special Education and I am a nationally Certified Classical Homeopath. I consider myself a Classical Homeopath by profession. I have been studying and using homeopathy for over 20 years most recently in Massachusetts for the past 12 years because I cannot practice as a professional homeopath in my own state of Connecticut. My office is on the Connecticut/Massachusetts border and many of my patients from northern Connecticut come to see me there.

The purpose of my testimony today is to request your support of **Raised Bill No. 5327 - An Act Concerning Health Freedom and the Practice of Classical Homeopathy**. In my private practice, I specialize in treating- almost exclusively with classical homeopathy - children and adolescents with special needs including AD/HD, Asperger Syndrome, Obsessive Compulsive Disorder, Conduct Disorder and other serious emotional disturbances including anxiety and depression. Classical homeopathy provides a safe, natural, non-toxic alternative to prescription medications with the added benefit of no harmful side effects. *(I have listed three excellent books on this subject at the end of this testimony.)*

As more and more information becomes available regarding the harmful effects of psychiatric medications and the public's demand (Access to Complementary and Alternative medicine is covered in the Affordable Care Act) for safe treatment, I believe the parents of children suffering from these emotional challenges have the

right to avail themselves of natural, alternative and effective treatments and classical homeopathy is one such treatment.

Passage of the Bill No. 5327 would permit highly trained and qualified Certified Classical Homeopaths to provide this service in Connecticut.

I applaud your effort to raise this Bill and ask for your continued support to its passage.

I appreciate the opportunity to provide testimony and thank you and your Legislative Aides for the work you have done so far. I would be happy to answer any questions you have or to provide further information. You can contact me by phone or email.

Respectfully submitted:

Dr. Louise Sanchione, ND, CCH, MA, MS
