

Dear Senator Gerratana and Representative Johnson and members of the Public Health Committee,

My family and I have benefitted from homeopathic treatment for years. Anecdotal incidents of cysts disappearing, eczema cured, and other healings have convinced us of the efficacy of this alternative medicine.

Accupuncture, massage therapy, naturopathy, among others, have long been acknowledged as useful treatments in addition to the more conventional "Western" medicine. Homeopathy is a "do no harm" treatment as well. Its practitioners are highly trained.

Homeopathy needs the light of legitimate recognition. There is room for everyone.

Please do your part to bring this bill to passage.

Thank you.

Sincerely,

Joanne Perlman
