

My name is Lauren DeLisa, resident of Cromwell, and I am in support of the Raised Bill 5327. I am writing to request your support of this Bill.

I have had a number of sessions with a Naturopathic Doctor (N.D.) who has provided me with homeopathic remedies to help heal my body's reaction to wheat. Homeopathy is a safe and gentle solution which complements conventional medicine. I just recently learned that only N.D.'s or medical doctors are allowed to practice homeopathy in the State. I have a very high deductible on medical insurance and it is not cost effective for me to always see an N.D. and many M.D.'s do not share in the same holistic route to medicine as a Homeopath. This also does not leave me with many options for homeopathic care in the State of Connecticut.

As a resident of CT, I see the need for more qualified homeopaths to be available to me as a consumer of natural remedies.

Lauren DeLisa
