

Michael Beale HB 5327

Hello I am Michael Beale, I'm 16 years old and I live in Wallingford, CT. I'm emailing to put my full support behind Raised Bill 5327: An Act Concerning Health Freedom and the Practice of Classical Homeopathy. I am advocating for this bill because it infringes on any citizen's right to their pursuit of happiness and it is a safe way to receive health care. It is affordable which puts more money in the consumer's pocket to spend in the market, it's perhaps the safest form of medicine other than laughter, and it plain and simple keeps the citizen's healthy. The only reason that classically trained homeopaths are unable to practice in Connecticut right now is from an outdated law that was made in 1893 to protect the public because of all the questions surrounding homeopathy. But medical science has progressed and now it is a known fact and scientifically proven that homeopathy causes no harm to a patient, and only helps. If the correct or incorrect medicine is given, there aren't any side effects of the remedy regardless. Imagine that, medicine without side effects! For example, from a very young age when I would get sick, my eye would water and get really puffy. The first remedy I received didn't work and the problem persisted, but it never got worse. The next remedy worked and my problem disappeared. I have never gotten sick past a fever because of natural medicines. This groundbreaking form of medicine needs to be more available to the public. A healthier population is a better population and *I ask you to throw your support behind Raised Bill 5327: An Act Concerning Health Freedom and the Practice of Classical Homeopathy.*

Thank you very much,
Michael Beale
