

Dear members of the Public Safety Committee,

My name is Jessica Bille. I am currently a student at Western Connecticut State University (WCSU). Within the last few weeks I have heard several student organizations start the discussion of how to implement good, healthy food in our meals. As a university we have taken the initiative to get an organic garden on campus. Unfortunately many other residents of Connecticut do not have healthy food to their disposal. Labeling food allows the consumer to make healthier decisions and is the first step to a healthier society. I am happy to support HH 5329.
