

I am in support of HB 5534, An Act Concerning the Provisions of Services to Individuals with Intellectual Disabilities. I am a parent of a young adult with intellectual disabilities that will be requiring supports throughout his adult life. The budget has been drastically cut these past few years. People requiring services are in desperate need of support. We all have an obligation to ensure that our most vulnerable population will be offered the necessary supports to live in dignity. The Department Of Developmental Disabilities must be adequately funded. Please support this legislation.
