

Hello,

I'm writing to express strong favor in expanding Autism services in the state of Connecticut. My name is Michael Geoffino, my address is 92 East Gate Lane, Hamden and I have a brother that is on the spectrum. If you haven't lived or spent considerable time with someone on the spectrum, then it is difficult to understand the issues and problems they face. The services that the state provides help people with disabilities to engage in life in a more normal way, and anyway we can help facilitate this is not just a good thing, it is our obligation as social participants in government and as people able to help others. I hope you will strongly consider expanding these resources as far as possible because without them our fellows would be lost.

Thanks,
Mike Geoffino
