

Anne Connaughton HB 5326

I urge you to reject HB 5326 the Assisted Suicide Bill. I am opposed to licensing doctors to prescribe drugs for the purpose of the ending the patient's life. Society should be improving methods of quality pain control and making sure that those who are terminally ill have access to hospice care. Assisted suicide (killing the patient) is NOT COMPASSIONATE. To call it that is just untrue. Please reject HB 5326.

Sincerely,

Anne Connaughton
