

Barry J. Wu, MD, FACP HB 5326

Dear Committee:

I have taught Yale Medical Students and residents for the past 20 years and instructed on the importance the values in the Hippocratic oath to do no harm. I do believe we need to protect the vulnerable including the poor, disabled, and elderly. I also adhere to the importance of providing compassionate care by means investing in hospice/palliative care for those who are dying. I am firmly against doctors prescribing medications to cause death. I believe this is against what it is to be a physician. Please vote no on HB 5326.

Sincerely yours,

Barry J. Wu, MD, FACP
Clinical Professor of Medicine
Yale School of Medicine
