

Jocelyn T. Shaw HB 5543

Please do not allow the change to the definition of "change in use" proposed by this bill. Any persons, companies, or others proposing changes in land use on land that protects public water supply need to be required to apply for a permit with the Department of Public Health.

Likewise, also please reject section 2 as proposed in this bill. Do not allow private professionals rather than the Commissioner of Public Health to make decisions about water company proposals.

Respectfully submitted,

Jocelyn T. Shaw.
