**Subject:** Salt road treatments in CT

**Importance:** High

Hi Nick,

Just want to add to the many Citizens in Connecticut and those who travel through our state including trucks and visiting vehicles.

The liquid salt treatment is destroying our vehicles. Every mechanic I have spoken to states it erodes the brakes, tires, front end and under body of the vehicle.

The auto mechanics business has increased significantly since CT changed over to this new salt treatment method.

Also, truck drivers are avoiding our state because it is costing them lots of money to repair their trucks.

We want people to visit CT not avoid it!

Thank you for your time and consideration.

Sincerely,

Loraine Seder
