

I support bill 5080. The main reason I support this bill is I work 6 (six) days a week often and that leaves me no days to hunt. I am considering not hunting in CT. and take a weeks vac. during deer season and hunt in another state, which means I would purchase my equipment in that other state as well.

There is such an over population of deer in CT that the season needs to be extended because they cause so much property damage (landscape, autos and personal). TY
