

Dear Environment Committee,

I am writing to express my support for HB 5416, to ban sow gestation crates in CT. This is a vote in favor of family farms and against agribusiness. It is a vote for the environment, as large scale hog operations are an environmental disaster. It is a vote for treating animals with some modicum of decency. And now is the perfect time to do it, before agribusiness gets a stronghold in our state.

Thank you for considering my comments.

Sincerely,
Julia Caruk
