

Please protect our State Forests. Last year, we came dangerously close to losing part of the Meshomasic, our First New England State Forest. Fortunately, with the help of our elected representatives, the citizen's voices were heard and Governor Malloy pulled the Firearms Facility Proposal. It was an eye-opening experience for many of us. Millions have been spent acquiring land for conservation but we now know that much of this land is not truly protected. The citizens of Connecticut value our State Parks and Forests and want them to be protected in perpetuity. Please support Bill 70 raised by the Environment Committee.

Thank you,

Melissa Pericolosi
