

SB 70

I urge the Environmental Committee to support Raised Bill 70 as a way to protect Connecticut's public lands. It is surprising that the state lands that people assume are protected can easily be sold without the public knowing about it, or having input into the process. The land at Hammonasset State Park that will be used for parking in Madison, or the attempted land swap along the Connecticut River in East Haddam are two examples of how the current system does not protect state lands.

Sincerely,
Thomas Ebersold
