

We have worked hard to make our home, our schools and our towns safe places for our children to learn, grow and play. GMO grass seed is being produced in order to sell and use greater amounts of toxic chemicals on lawns. Why on earth would anyone other than those with financial interest in such a product want to allow it in our state? We MUST ban GMO grass seeds before they are introduced into our environment. Please support legislation banning this atrocity NOW. Thank-you!
