

I am 100% against any Genetically Modified food, grass, or plants. Therefore, I support the Amendment to ban GMO grass and other perennials in Connecticut.

I sincerely hope our legislature will protect the integrity and sustainability of our natural resources and habitat in Connecticut. Banning GMO foods, grass or plants is certainly the best thing we can do for our ourselves, children, pets, and wildlife...in fact, for our collective future.

Thank you.
Brooke Carlson
