

Testimony for 5303

For the electronic record, I am writing in support of HB 5303. I feel very strongly that passage of this common-sense legislation will go a long way towards providing rational emergency care to children. Children who are susceptible to epileptic seizures may not always be in close vicinity to a registered nurse for proper medical attention when they have a seizure. Passage of HB 5303 will address such situations in a measured, cautious manner. We have an opportunity to potential reduce the chances of additional long-term health problems, and even death, in our most vulnerable citizens.

Thank you for your attention.
