

Peter Franklin, HB 5144

Dear Committee Members,

I was separated from my biological family by adoption and when my daughter had a seizure, without a family medical history we decided to medicate her for 3 long years until she reached puberty. She never had another seizure but I worry everyday that she took unnecessary drugs with untold effects because I couldn't fill out a form that non-adopted persons take for granted. Secret adoption is barbaric and affects generations.

This bill is about health, healing, and honesty. Please don't be distracted by the opposition, enough birth parents have passed away that they should not be worried about their own unethical practices seeing the light of day.

v/r
