Please considering passing a similar bill which Utah passed regarding the education and testing for CMV. My daughter was born with congenital CMV and I only wish I had been informed of the risks when I was pregnant with her. We had a fantastic doctor who took the initiative to test our daughter for CMV after she failed a hearing test at birth. The quick identification of the CMV virus in her system enabled us to begin the medication regime immediately, which is the recommended to sustain any benefits of the medication. If you have additional questions, please call me at (406) 868 8997.

Sincerely,

Christie Slaughter
