

Dawn LeBoeuf Bill HB 5147

I support Bill HB 5147 for CMV awareness, and CMV education for all pregnant women and CMV Testing and treatment for newborns!

I raise my 2 ½ year old granddaughter born with congenital CMV. No education or information was provided to us about this virus when they told her mom and me she was positive for it at 13 days old. Medications could have been given sooner if we had been informed of this virus and looking for it. If the doctors would perform testing during pregnancy, measures could have been taken during pregnancy. It should never take 13 days to find out this devastating information.

STOMP OUT & STOP CMV I would like to see this bill pass in your state and also be implemented in other states

Thanks

Dawn LeBoeuf
