

Jane Stewart HB 5147

A friend of ours recently lost their second new born child because of CMV. The baby might have been spared had the parents been educated to this problem in the beginning. **I support Bill HB5147 for CMV awareness, and CMV education for all pregnant women and CMV testing and treatment for newborns.**

A similar CMV education bill was recently passed into law in the State of Utah in 2013. Please support this very important public health bill for Connecticut.

Sincerely,

Jane Stewart
