HB 5537

March 12, 2014

Dear CT PHC Testimony,

Dear Senator Gerratana, Representative Johnson, and esteemed members of the Public Health Committee:

I write to ask you to strongly support and vote in the affirmative to add bill language for the modernization of the CT Naturopathic physician scope of practice to HB 5537. The language needs to be attached to this bill so it can come before the Public Health Committee for consideration. This Naturopathic scope of practice law is 90 years old and has not kept pace with the significant advances in education and training of Naturopathic doctors in the ensuing decades.

My experience with Naturopathic Medicine is extremely positive! I began because I was having trouble conceiving a child and through the simple use of blood tests and natural supplements, I was able to conceive within three months! All of the conventional fertility doctors told me that there was nothing wrong with me and that I should immediately start taking fertility drugs and begin artificial insemination, which could have caused numerous side effects, been unsuccessful, been very stressful, and cost a considerable amount of money and time!! I recommend my naturopathic doctor to everybody I know for specific problems as well as for general health. I continue to see my naturopathic doctor regularly to maintain my nutrient levels and I have never been healthier.

Thank you for your support and consideration.

Sincerely,
Corrie Fisher
