HB 5537

March 12, 2014

Dear CT PHC Testimony,

Dear Senator Gerratana, Representative Johnson, and esteemed members of the Public Health Committee:

I write to ask you to strongly support and vote in the affirmative to add bill language for the modernization of the CT Naturopathic physician scope of practice to HB 5537. The language needs to be attached to this bill so it can come before the Public Health Committee for consideration. This Naturopathic scope of practice law is 90 years old and has not kept pace with the significant advances in education and training of Naturopathic doctors in the ensuing decades.

My son was very sick last winter 2013. He had been on 4 Z (antibiotic) packs in the time span on 4 months and had a chronic bronchial cough that would NOT go away. His regular doctor wanted to label him asthmatic after 15 years of being totally healthy. I was at my wits end, my friend suggested I go see Dr. Hinchey. Thank god I did she met with us took a complete medical history. She ran some blood test and we went back in a week. She started my son on Grapefruit seed extract to attack the cough. She was a lifesaver. He quickly responded to the vitamins and the cough was no longer there in a month. We have since stayed on her recommended vitamins for my son and he has not had even one cold a year later. I am so thankful for Dr. Hinchey she cured my son in one month. He is very healthy, he just turned 16 and swam for his school for the first time this year. I owe his amazing health to Dr. Hinchey she is very smart and a great doctor! Thank you!

Thank you for your support and consideration.

Sincerely,
Joanne Wheatley
