

Roberto A. Gobbee, M.D. SB 36

Based on my experience of several years on collaborative practice with Ines M. Zemaitis APRN, BC I am in favor of expanding and clarifying the autonomy of the APRNs, provided they have a similar level of knowledge and responsibility.

The current Bill would improve access but I do not see specific provisions on maintaining or improving the quality of the healthcare.

Sincerely,

Roberto A. Gobbee, M.D.
