

To whom it may concern.

As President of the Friends of the Danbury Library I am very upset that the Governor of this great state of Connecticut does not support funding for our Libraries. This state has always been known for its quality of life, its parks, its museums, its education both public and higher education. The Governor does not seem to value things that are important for people who live here or may want to move here. This is a very big mistake to not fund libraries which have wonderful programs for people of all ages and backgrounds.. Shame on him.

Sincerely yours,

Connie Kaufman
