

All I can do is BEG! Please NO MORE CUTS TO DDS! These learning disabled adults and youth need help! They can't work at a job to support themselves without your help, many will be homeless, unable to feed themselves! Have some compassion for them they want nothing more to be a useful part of society, but without help they can't be trained to work or live independently! Spending a little now will save money in the long run. The normal family can not pay to have them trained and shouldn't have to spend their retirement money to support them for the rest of their lives! And what happens when their family members are gone, and they have no way to support themselves, are you going to throw them into a facility that will cost more!?! Give them the support they need to learn a job and live happy independent lives!!!!!!
