

March 3, 2015

Senator Bye, Representative Walker and the Honorable members of the Appropriations Committee:

I understand that there is a lot of depression and anger. Some depression is normal but some depression is suicidal.

I am also in treatment in the Wheeler Clinic. I have developed myself mentally and physically with the treatment that society provides. If the budget is cut then it will cause worse depression in the community.

People the only thing we should do as a community is pray for the government, the [mayor] and the community as a whole, and don't blame...ANYONE.
