

It is time to reign in state spending and this bill is a good first start. Our state is now one of the costliest to live in and it is one of the most debt ridden states in the country. There are, of course additional solutions such as assigning all the lottery revenues to education instead of the general fund. Gambling revenues should be in the same category. Reduce all agency spending by 20 percent. Close some agencies. Institute an immediate hiring freeze until further notice.

In the meantime please support Senate Bill 128.

Sincerely,

Robert Holland
