

To The members of the state House & Senate

I think it is high time that you ALL start to realize that the can can not be kicked down the road any further!!!

We here in CT do not need more taxes, more tolls, more borrowing and higher license fees. What we need is for all of you to realize that we have a spending problem.

The Lord knows that you have scavenged every dime from Casino gambling money and the money from gas taxes and blown it on the general fund.

You have floated losing investments on all kinds of entitlement and social welfare programs that have returned absolutely nothing to the state.

Schools still perform badly!!

Black on black crime continues to climb!!

The poor are no better off now than before all this money was spent!!

Young skilled working people are leaving this state!!

Time to get your priorities straight---no new tolls, no new taxes.

Reduce the spending, reduce the taxes on people and businesses, make CT a right to work state.

Then there is a good chance that business will start to grow again and CT will stop its downward spiral into another Detroit / Chicago like place

Time to look around and realize that more of the same AIN'T GONNA CUT IT. TAKE A LOOK AT THE RESULTS ATTAINED BY GOV. SCOTT WALKER

Is he smarter the you folks

best regards

Ron Shurilla
