

Dear Co-chair Kennedy, Co-chair Albis, and Honorable Members of the Environment Committee,

Please accept this testimony in SUPPORT of HB 6955.

It's mind-boggling and painful to realize that legislation moves so slowly on issues that easily qualify as no-brainers. The activity inherent in the wildlife trade requires soulless, barbaric behavior and it continues widespread unless people with conscience take action to do the right thing. We all must do what we can to stand up to this evil. Please help CT be a state that says NO to trading in the repulsive material items that result from the vicious violation and immense suffering of innocent, beautiful, magnificent beings.

Yours truly,

David Beskind
Hartford, CT
