

To Whom It May Concern:

I urge you to pass HB6955, a bill to ban the sale of ivory and rhino horn in our state.

Recently Daniel Ashe, the director of the US FWS underscored American's role in the plummeting rhino and elephant populations: "The ongoing slaughter of rhinos and elephants in Africa is driven by rising consumer demand here, and United States citizens are intimately involved in illegal trade both here and abroad"

With your help, we can reverse these horrors!

Thank you for your consideration.
