

# African Wildlife

SUPPORT bill HB 6955 and stop market demand for  
elephant ivory and rhinoceros horns in Connecticut

# End Animal Exploitation

Dear Co-chair Kennedy, Co-chair Albis, and Honorable Members of the Environment Committee,

For centuries, animals have been exploited, have been regarded as beasts of burden and have wrongly been an economic force.

Science now knows that animals are an essential component of earthly things and new legislative thinking is required. I implore you to support HB 6955 and make a step toward changing the culture of human beings so that our society can become humane, compassionate and benevolent.

Sincerely,

Ronald W. DeGray
