

Please support HB 5733 to divest state funds from the fossil fuel industry, HB 6957 to establish a battery recycling bill, HB 5286 to outlaw the selling and importing of plastic microbeads, and SB 1061 to establish a State Parks Sustainability Account. All of these bills would result in moving CT forward in environmental protection and sustainability and need to have strong support.

Thank you,
Eszter Samodai
Amston, CT
