

I am writing to support the passage of SB 1061, HB 6957 and HB 5733. These legislative initiatives move the state in the right direction of getting plastics out of our waters, safely recycling batteries, securely funding our state parks, and divesting from fossil fuels. All of these initiatives are crucial if we want to seriously address the threats to our environment and climate change. I strongly support their passage.

Sincerely,
Nancy Watson
