Subject: SB 928 An Act Concerning Shared Clean Energy Facilities

Follow Up Flag: Follow up
Flag Status: Flagged

Dear Rep. Jesse MacLachlan,

I am writing to ask you to support expanding access to renewable energy, like solar PV, to all Connecticut families and businesses through creation of a shared renewable energy program. I urge your support of Raised Bill SB 928, which will do just that. Shared renewable energy will empower renters and many others to choose solar and wind for the first time - and will save consumers money and unleash significant private investment into the state's growing clean energy economy.

By expanding the market for renewable energy to the majority of energy consumers, Connecticut can multiply economic as well as environmental benefits. The solar industry alone has added around 500 jobs in the past year and each new installation leads to investment in the local economy and long term energy savings to local consumers.

Please let me know where you stand on this issue and why. I am hoping that you will support swift passage of Raised Bill SB 928, but if you cannot support the bill, I would like to understand why not.

Respectfully,

Debbie Lundgren
Clinton, CT
