Subject: Fracked Gas Pipelines

Please do everything possible to stop fracked gas pipelines in Connecticut. Our citizens health should not be sacrificed for the sake of a company's profit. Money shouldn't matter more than people. Our children are at greatest risk. Everyone of us in CT would have done anything to save the 20 children taken too soon in Sandy Hook. Approving the fracked has pipeline would be knowingly sentencing our children to future health problems. We can and should save them. Please do not allow fracked gas pipelines in Connecticut.

Sincerely,
Anupam Pertab
