

To the Finance, Revenue & Bonding Committee:

As a board member of Bike Walk Connecticut and a Connecticut resident, I strongly support the Governor's proposals to develop and fund a first-rate active transportation network of bike lanes, greenways, multiuse paths, and pedestrian infrastructure in Connecticut. Please support HB 6840.

- Biking and walking are cost-effective ways to reduce traffic congestion – they are good for the environment, our health, and our economy.
- Bike lanes, sidewalks and greenways cost a fraction of what it costs to build and maintain roads. People want to bike and walk more, but many don't feel safe without bike lanes, greenways and sidewalks. The demand is there - build them and people will use them.
- Since transportation is the biggest contributor to greenhouse gases in Connecticut, consider that biking and walking couldn't be greener ways to get around. Active transportation must be a key piece of our climate action plan.
- Connecticut is car-dependent. This lifestyle is not what millennials, as well as many others have in mind. A well-designed active transportation network will help bring a significant number of people to Connecticut and keep them here, strengthening our economy. Additionally, walkable, bikeable places would boost tourism immeasurably, with benefits spreading throughout our economy.

For so many reasons, it's time for Connecticut to become a great place to bike and walk. Please support HB 6840.

Thank you.
