

To the Finance, Revenue & Bonding Committee:

As a member of Bike Walk Connecticut, I support the Governor's proposals to develop and fund a first-rate active transportation network of bike lanes, greenways, multiuse paths, and pedestrian infrastructure in Connecticut. Please support HB 6840.

- Biking and walking are cost-effective ways to reduce traffic congestion, and they're good for the environment, our health, and our economy.
- Bike lanes, sidewalks and greenways cost a fraction of what it costs to build and maintain roads. People want to bike and walk more, but many don't feel safe without bike lanes, greenways and sidewalks. Build them and people will use them. Many towns, such as Manchester, improve roads without consideration for walkers and cyclists. This factor discourages those that want to use cycling or walking as a part of exercise, and for commuting. As the obesity rate increases and people remain sedentary, medical costs are skyrocketing. Give people a safe method for exercising and commuting, improving our bike lanes, greenways, and paths, and people will improve their health, and enjoy a better quality of life.
- Connecticut's car-dependent lifestyle is not the lifestyle that millennials or the creative class have in mind. A well-designed active transportation network will help bring millennials and the creative class to Connecticut and keep them here, strengthening our economy. Additionally, walkable, bikeable places would boost tourism immeasurably, with benefits spreading throughout our economy.

For so many reasons, it's time for Connecticut to become a great place to bike and walk. Please support HB 6840.

Thank you.
