

I have a degree in education and could not find a job in education when I received my degree. I went back to school at Tunxis Community College and received a degree in Accounting.

At the time, I was taking my Accounting and Economics courses for my degree. The teacher that I had said the worst thing that could happen in the state of Connecticut is to have gambling. It will not bring in the amount of money that they are saying it will bring in to the state. He also talked about the crime that follows this form of business. He was so correct in this statement. He said that we need to bring businesses and factories into the state and it will bring in wealth to the state that will help CT for years to come.

The same thing is true now. Gambling will destroy people and families. We now have to have Gamblers Help-Lines for people who go into debt gambling. People are losing their homes and families with this form of addiction. From what I have heard, we are spending more money with the upkeep on Route 2 and police protection on it as well and in the casinos as well.

I do not go to the casinos except to go to Mohegan Sun Girl's Games and have finally stopped that as it was running into too much time getting there from Bristol and the cost of the games. Then when I was there, I would only buy a small meal like soup and that would be all that I did while I was there. The stores were very expensive and not worth what items cost.

Please no more Gambling in Connecticut. Sincerely, Carol Sisson
